

BuilderERP

USER GUIDE

Build smarter. Manage everything.

A practical guide to navigating projects, property, procurement, people, payments, quality, safety, and operations in one connected platform.

Your first five minutes

Sign in, orient yourself, and reach the right workspace quickly.

Sign in securely

1

Open the login page

Launch the BuilderERP URL in your browser.

2

Enter your credentials

Type your email and password, then select Sign In.

3

Request access if needed

An administrator creates accounts and assigns the roles that control what you can see and do.

4

Know the logout rule

Five incorrect password attempts lock the account for 15 minutes.

Know the screen

TOP

Top bar

Logo/home, global search, notifications, messages, and your account menu.

NAV

Left sidebar

Collapsible module menu. Expand a section or use the hamburger icon for more space.

VIEW

Main content

The active list, record, dashboard, form, report, or workflow screen.

**Permission-aware navigation**

You only see modules and action buttons granted by your role. If something is missing, first expand the sidebar section, then ask an administrator to verify your permissions.

One pattern across the platform

Learn the shared record pattern once, then use it in nearly every module.

The common record journey

Validation helps prevent bad data. Required fields are marked, errors appear near the field, and forms cannot be submitted until the issues are resolved.

Start from the management dashboard

Dashboard & Analytics - Management Dashboard is the landing page for users with dashboard access. Use the cross-module snapshot to spot what needs attention, then drill into the relevant module.

Helpful habits

From property inventory to payment

Set up sellable units, nurture buyers, close agreements, and collect installments.

PM Property Management

Buildings > Towers > Floors > Property Units

Build the physical inventory hierarchy before bookings. Every booking or sale agreement points to a specific property unit.

CRM CRM

Leads > Inquiries > Follow-ups > Customers

Capture prospects, schedule calls or visits, and convert qualified buyers into customer records used by Sales.

SA Sales

Quotations > Bookings > Sale Agreements

Issue a price quotation, reserve a property unit, and produce the formal agreement.

IN Installments

Plans > Installments > Receipts

Define the payment schedule, monitor due and paid status, and record receipts for money received.

Recommended operating sequence

BEFORE YOU BOOK

Confirm that the inventory unit, customer record, and your permissions are ready before starting a booking.

Inventory

Customer

Access

Procure, plan, build, and approve

Connect purchasing decisions with construction execution, engineering control, and cost visibility.

PO Procurement

Suppliers > Requisitions > RFQs > Vendor Quotations > Purchase Orders > Goods Receives > Returns

Run the complete procure-to-pay flow: request a need, seek and compare supplier quotes, issue an order, receive goods against it, and document returns when required.

Construction control center

PLAN

WBS + Gantt

Break the project into tasks and visualize timing.

MEASURE

Milestones + BOQ

Define progress points and manage quantities.

RECORD

Daily Progress + Photos

Capture what happened on site each day.

CONTROL

Delay + Budget

Analyze schedule impact and budget vs actual.

Engineering governance

ENG Engineering

Drawings > Revisions > Approvals

Maintain drawing history and complete approval before information is released for construction.

RELEASE CHECK

Confirm the latest revision, approval status, and intended construction use before acting on a drawing.

Manage contractors, labor, and equipment

Keep external partners, site teams, and machinery accountable and traceable.

Contractor Management

[Contractors](#) > [Work Orders](#) > [Rate Contracts](#) > [Running Bills](#) > [Deposits](#) > [Evaluations](#) > [Ledger](#)

Onboard contractors, issue work, process interim bills, hold security deposits, review performance, and track the running account.

Labor Management

[Workers](#) > [Attendance](#) > [Overtime](#) > [Wages](#) > [Safety Training](#)

Maintain the workforce roster and daily attendance, calculate overtime and wages, and keep mandatory training records current.

Equipment Management

[Equipment](#) > [Rentals](#) > [Fuel Logs](#) > [Maintenance](#) > [Operator Assignment](#)

Track owned or rented machinery, fuel usage, maintenance history, and responsible operators.

Protect quality, safety, stock, and records

Use connected controls to preserve site standards and a reliable audit trail.

QC Quality Control

Materials > Site > Tests > NCR > Punch List > Checklist

Inspect inputs and work, record test results, raise non-conformance reports, and close defects.

HSE Safety (HSE)

PPE > Inspections > Incidents > Risk > Audits

Track PPE, assess hazards, record incidents, and conduct inspections and audits.

DOC Document Management

Documents > Versions

Store project and contract documents centrally; review or roll back revision history.

INV Inventory

Warehouses > Materials > Stock > Transfers > Issues > Returns > Adjustments

Control locations, stock balances, movements, issues to sites, returns, and corrections.

LEG Legal Module

Land Documents > Mutations > Registrations > Cases > Agreements > Notices

Manage land title and ownership processes alongside legal cases, agreements, and notices.

From handover to everyday service

Continue the customer relationship after construction and get help when something blocks you.

AH After Handover

[Handovers](#) > [Snags](#) > [Defects](#) > [Warranties](#) > [Maintenance](#) > [Tickets](#)

Record unit delivery, resolve snag items and defects, track warranty windows, and manage service requests.

FM Facility Management

[Maintenance](#) > [Utilities](#) > [Visitors](#) > [Security](#) > [Parking](#) > [Common Areas](#)

Operate completed buildings, bill utilities, manage access and parking, and schedule shared amenities.

REP Reports

[Report Catalog](#) > [Filters](#) > [Excel](#) / [PDF](#)

Choose a report, set available filters, view it on screen, or export it to Excel or PDF.

FIND Search

[Global search](#) + [list filters](#)

Find supported records by name or number, then narrow module lists with inline filters.

Roles and permissions

Users receive one or more Roles. Each role bundles permissions such as [ProjectView](#) or [PurchaseOrderCreate](#). Menus and Create/Edit/Delete buttons appear only when the assigned role grants them.

Quick fixes

Menu missing?

Expand the sidebar section; if it is still absent, ask an administrator to check access.

Delete blocked?

The record may be referenced elsewhere. Edit or deactivate it, or resolve dependencies first.

Form blocked?

Resolve every red validation message and complete all required fields.

Session expired?

Sign in again; you will typically return to where you left off.
